

# Sassy Up Your Seatbelt!

Ports can make chemo more convenient & neat  
Till you get in your car, and you sit in your seat.  
You buckle your seatbelt and it hurts quite a lot  
'Cuz the strap hits the port-a-cath's very same spot.  
So here is a pillow you put on your seatbelt  
To cover your port, so less pressure is felt.  
It's made by some friends, more than a few,  
Saying, "Fight it with sass! We're rooting for you!"
